ICMM 2010

First Announcement

Invitation

It is our great pleasure to announce the 12th International Conference on Molecule-Based Magnets (ICMM) to be held in Beijing, China from October 8 to 12, 2010. The ICMM is the largest biennial event in the interdisciplinary and growing field of Molecular Magnetism.

ICMM2010 will provide a unique forum for in-depth assessment of the challenges involved in the dynamic and fast moving field of interdisciplinary research. It will bring together leading chemists, physicists, materials scientists and other allied professionals to discuss and present the latest important developments in all important areas of Molecular Magnetism and related research fields. ICMM2010 will cover a diverse range of topics including organic/inorganic/hybrid magnetic molecular materials, multifunctional and/or switchable molecule-based magnetic materials, molecular nanomagnets, nanostructural molecular magnets, molecular magnetism in biology and molecular spintronics; from synthetic strategies and techniques to the new instrumentation and theoretical approaches.

The organizing committee of ICMM2010 warmly invites you to participate in this exciting conference at Beijing. As the capital, the political, cultural, scientific and education centre of China, Beijing is one of the largest cities in the world with a long history. It was the capital of the Yuan, Ming and Qing Dynasties. Today's Beijing mingles tradition and modernity.

We look forward to welcoming you next fall, in the golden season of Beijing.
